EXPERIENCE

Staff Frontend Engineer

Cloudbeds

📅 2022 - 07/2024   📍 Sandiego, CA

Cloudbeds is the hospitality industry's fastest-growing technology partner, serving a global customer base of thousands of properties across 157 countries.

- Designed and implemented microfrontend architecture to improve salability, maintainability, reusability, and enhanced collaboration
- Developed and maintained multiple microfrontends, including mfdcommon, mfd-module, and mfd-dashboard, utilizing React.js, Chakra UI, and React Query
- Implemented scalable and maintainable frontend architectures, ensuring optimal performance and usability for millions of users
- Developed and deployed a custom UI library tailored to the company's specific needs by customizing Chakra UI and Tailwind CSS.

Lead Frontend Engineer

Vytalize Health

📅 04/2020 - 12/2021   📍 San Francisco, CA

Vytalize Health is a leading value-based care platform, helping independent physicians and practices stay ahead in a rapidly changing healthcare system by strengthening relationships with their patients through data-driven, holistic and personalized care.

- Led the UI development from scratch using React.js, React Query, Redux, MUI(Material UI), Typescript and Tailwind CSS
- Implemented the Test-Driven Development (TDD) process by creating comprehensive unit and integration tests for all major components and user flows
- Enhanced overall performance, achieving a 25% reduction in page load time, by implementing infinite scroll and integrating Elasticsearch on the patient list page
- Closely collaborated with product management team and designers to provide them with feedback on the UX/UI design

Senior Frontend Developer

WildHealth

📅 11/2018 - 02/2020   📍 Lexington, KY

Wild Health was founded in response to a broken medical system, one focused on sick care instead of healthcare.

- Built patients report pages using React.js, Next.js, React Context, React Query, React Hook Form. Typescript, Tailwind CSS and MUI(Material UI)
- Implemented real-time messaging functionality, enabling chat between patients and health coaches through integration with the Twilio API
- Refactored the existing frontend codebase to adhere to best practices and implemented mobile responsiveness across all pages, enhancing the user experience
- Developed a DNA analysis and meeting scheduling module for health coaches, incorporating Test-Driven Development (TDD) practices throughout all development cycles

EXPERIENCE

Senior Full Stack Developer

Enola Labs Software

📅 01/2015 - 10/2018   📍 Austin, TX

Enola Labs Software is a recognized leader in technical architecture, cloudenablement, legacy modernization and custom software development services including web applications, mobile apps and all the latest underlying technologies.

- Developed and customized multiple web and mobile apps for eCommerce, B2B, B2C, Health Care by using React.js, Vue.js, Angular1/2, Typescript, Flux
- Added analytics tracking to the web application using Segment, Mixpanel and Google Analytics
- Wrote unit testing, integration testing and e2e testing using Mocha, Jest, Enzyme, and Cypress
- Developed a hybrid MLM system by using Vue.js, Vuetify, Vuex, Vuechart, D3.js for the frontend and Laravel/PHP for the backend

Full Stack Developer

BlackLocus

📅 09/2012 - 12/2014   📍 Austin, TX

BlackLocus is a former startup team acquired by Home Depot, the top home improvement retailer in the world. To stay ahead of the curve, Home Depot is making a substantial investment in data science, innovation, technology and design

- Worked as a part of an Agile team in the development of enterprise services for clients
- Added analytics tracking to the web application using Segment, Mixpanel and Google Analytics
- Developed a custom tagging tool for marking trip destinations using Yahoo!'s GeoPlanet API
- Worked on several e-commerce engines for customers using Javascript, Magento, PHP, jQuery.

EDUCATION

B.A in Computer Science

The University of Texas at Austin

📅 2008 - 2012   📍 Austin, TX
